Art Unit: 2833

1. Claims 2-10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear in claim 2 and the remaining claims how locking can be canceled by the convex portion (i.e. where is the leverage applied?).

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hiramoto et al.

Disclosed are lock projection 6 and lock receiving portion 29.

4. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: claim 2 as a whole, particularly an inner cancellation convex portion used to unlock the connectors, is not anticipated or rendered obvious by the prior art of record.

6. The other references cited on Form 892 disclose similar locking means.
